

amegari

A tiny big adventure

Orkatz and I decided to build up this little company after carving timber lures for 6 years. Along this time, we have produced above 100 fine performing prototypes to go for tunas. We focused on paulownia floating lures because nothing satisfied us more than a surface strike and paulownia is magic when focusing action. During this time we have been improving our lures in search of best fish liking. And that is why Amegari, first of all, is lure action: what moves fish towards surface. We want our lures to sweep or slide. If they don't, we don't want them. If in addition they WTD or twitch, much better.

Then we went worried on paulownia lures' durability which comes up short on most lures available carved in this timber. That is why every Amegari lure has a first 2 x sealing coats oriented on wood hardening and which still maintains its natural buoyancy. Then two additional epoxy coatings, deep sanding, painting, 2 x urethane coats, then applied foiling and holographies, more painting, one more epoxy coat, (brand, model and eyes stickers), 3 x epoxy coatings, secret treatment :D, water sanding, 3 urethane coats, water sanding, and 3 more urethane coats (that at least!! :). Above 12 days of treatment and then 10 days curating for hardening. Result is an hard elastic coating deep enough to stand treble impacts and allow certain hook point penetration (we are now using single hooking and going to stick to it, much better to release fish and fight more satisfying wars).

Our lures are control tested as they are all different. Very close, but different since we use machinery, but got our own way of doing things so everything is handmade. We pick several from every months production to check action is perfect. We respond for our lures in case of any type of problem.

Our goal with Amegari is to stay close to what we like best, fishing, and to anglers, as we share same interests and passion. Of course, keep on casting like there is no tomorrow. That is why we only build lures in very limited quantity so we can improve every day and take time to make prototypes, cast & cast, search for new artifacts (we like every sort of fishing, of course!!) and still travel everywhere.

So this said, obviously, we are not wholesalers. Our monthly production is around 200 lures (we don't produce all models every month, just what the few shops we work -and want to work- for ask).

We have two lines of lures. What we call "Tuna Toys" and the larger "GT Toys". About colours, 6 usual finishes and 2 "flying fish" finishes for each model. If you consider our lures to stock your shop, you can choose all aspects involving appearance of the Amegari lures and could even work shortly on exclusive decos matching area baitfish if batches are large enough (remember we scape from mass production, so this is easy for us).

TUNA TOYS
Handcrafted by anglers

Lure Range

2mm S/S through wiring

Kaxü 215 FS

Floating Sweeper

DETAILS:

Carved out of Paulownia wood

Length: 215mm

Weight: 95-100g

Recommended trebles: ST66 4/0

Max size trebles: ST76 4/0

Suitable for single hooking.

ACTION:

Ultra balanced sweeper on both long and short sweeps (splash, bubble trail and vertical and horizontal "S" swim).

Excellent swimmer on linear retrieving. Rough waters tuned.

1,6mm S/S through wiring

Mèhe 185 FSE

Floating Sweeper Easy Sweep Tuned

DETAILS:

Carved out of Paulownia wood

Length: 105mm

Weight: 65g

Recommended trebles: ST66 3/0

Max size trebles: ST76 3/0

Suitable for single hooking.

ACTION:

Long jerks for easy sweeping with extreme rolling action.

twitching action and topwater WTD.

Dzanga 160 FPD

Bubbletrail Sweeping Popper

DETAILS:

Carved out of Paulownia wood

Length: 160mm

Weight: 55g

Recommended trebles: BKK Raptor Z 3/0

Suitable for single hooking and combined treble/single

ACTION:

Long/short sweeps for massive turbulence, rolling "S" action and large bubble trail.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

2mm S/S through wiring

Dzanga 180 FPD

Floating Popper Diver

DETAILS:

Carved out of Paulownia wood

Length: 180mm

Weight: 85g

Recommended trebles: ST66 3/0

Max size trebles: ST66 4/0

Suitable for single hooking.

ACTION:

Long jerks for diving action and "S"

line bubble trailing. "POP" sounder.

Short jerks for pop & splash.

Topwater spitting WTD.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

1.6mm S/S through wiring

Dzanga 195 FPD

Bubbletrail Sweeping Popper

DETAILS:

Carved out of Paulownia wood

Length: 195mm

Weight: 85-95g

Recommended trebles: ST76 3/0

Max size trebles: ST66 4/0

Suitable for single hooking.

ACTION:

Long/short sweeps for massive turbulence, rolling "S" action and large bubble trail.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

1,6mm S/S through wiring

Leen 145 FS

Floating Sweeper & Twitcher

DETAILS:

Carved out of Paulownia wood

Length: 145mm

Weight: 42-45g

Recommended trebles: Owner ST66 2/0

Suitable for single hooks.

ACTION:

Short/long sweeps for splash, bubble trail and random "Z" swimming action. Topwater erratic WTD. Linear retrieving for minnow action.

1,6mm S/S through wiring

Leen 180 FS

Floating Sweeper & Twitcher

DETAILS:

Carved out of Paulownia wood

Length: 180mm

Weight: 75-80g

Recommended trebles: Owner ST76 3/0

Suitable for single hooks.

ACTION:

Short/long sweeps for splash, bubble trail and random "Z" swimming action. Topwater erratic WTD. Linear retrieving for minnow action.

1.6mm S/S through wiring

Urpekari 190 FDP

190mm Floating Diving popper

DETAILS:

Carved out of Paulownia wood

Length: 190mm

Weight: 80-85g

Recommended trebles: ST76 3/0

Max size trebles: ST66 4/0

Suitable for single hooking.

ACTION:

Long/short sweeps for a combination of rolling and wobbling action with huge bubbletrailing & massive topwater turbulence.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

1,6mm S/S through wiring

Lingo 160 & 190 S

Floating stickbait. Sweep & twitch

DETAILS:

Carved out of Sapelle wood

Length: 160 & 190mm

Weight: 95 & 140g

Trebles: BKK 3/0 & 6/0

Suitable for single hooking or mixed treble/ single

ACTION:

Short & Long Jerks for easy sweeping with extreme "S" action.

twitching action and subsurface WTD.

1,6mm S/S through wiring

Flavie 150 & 180 F

Floating stickbait. Sweep & twitch

DETAILS:

Carved out of Paulownia wood

Length: 150 & 180mm

Weight: 50 & 75g

Trebles: BKK 2/0 & 4/0

Suitable for single hooking or mixed treble/ single

ACTION:

Short & Long jerks for easy sweeping with extreme rolling action. twitching action and topwater WTD.

Flavie 130, 150 & 180 S

Sinking stickbait. Sweep & twitch

DETAILS:

Carved out of Sapelle wood

Length: 130, 150 & 180mm

Weight: 60, 80 & 120g

Trebles: BKK size 1, 2/0 & 4/0

Suitable for single hooking or mixed treble/ single

ACTION:

Short & Long jerks for easy sweeping with extreme rolling action. twitching action and subsurface WTD.

GT  **TOYS**
Handcrafted by anglers

Lure Range

2mm S/S through wiring

Dzanga 230 / 40cup Bubbletrail Sweeping Popper

DETAILS:

Crafted from Paulownia wood

Length: 230mm

Weight: 140-155g

Recommended hooks: GT Recorder

6/0 or 7/0 belly, Kudako 8/0 tail

Single hooking: Jignesys 15/0

2mm S/S through wiring

ACTION:

Long/short sweeps for massive turbulence, rolling "S" action and large bubble trail.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

1.6mm to 2mm S/S through wiring

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

Dzanga BIG CUP

Bubbletrail Sweeping Popper

DETAILS:

Crafted from Paulownia wood

Length: 160, 195, 215 & 230mm

Weight: 55g, 95g, 135g & 155g

Recommended BKK hooks:

2/0, 4/0 or 5/0, 6/0 and 7/0

Suited for single hooking, BKK LONE DIABLO

1.6mm to 2mm S/S through wiring

ACTION:

Long/short sweeps for massive turbulence, rolling "S" action and large bubble trail.

2.0mm S/S through wiring

Urpekari 220 FDP

220mm Floating Diving popper

DETAILS:

Carved out of Paulownia wood

Length: 220mm

Weight: 130-140g range

Recommended trebles: BKK GT Rex 5/0 or 6/0

Single hooking: BKK LONE DIABLO 13/0

2mm S/S through wiring

ACTION:

Long/short sweeps for a combination of rolling and wobbling action with huge bubbletrailing & massive topwater turbulence.

IMPORTANT NOTICE:

Cups are handcarved, irregular and all different. Do not look for the usual drilled perfect appearance.

2mm S/S through wiring

Mèhe 225 FS

Floating Sweeper & Twitcher

DETAILS:

Carved out of Paulownia wood

Length: 225mm

Weight: 105-110g

Recommended trebles: ST76 4/0

Max size trebles: GT Recorder 6/0

Suitable for single hooking or belly treble tail single Shout Kudako 8/0.

ACTION:

Short/long sweeps for splash, bubble trail and "S" swim with rolling action. Topwater WTD.

2mm S/S through wiring

Mèhe 255 FS Floating Sweeper

DETAILS:

Carved out of Paulownia wood

Length: 255mm

Weight: 155g

Recommended hooks: GT Recorder 6/0
or 7/0. Also 7/0 belly, Kudako 8/0 tail

Single hooking: Jignesys 15/0

2mm S/S through wiring.

ACTION:

Long/short sweeps for rolling "S"
swim along with splash and bubble
trail. Hard jerk for bouncing
splashing.

2mm S/S through wiring

Kaxü 240 FS

Floating Sweeper Rough Waters

DETAILS:

Crafted from Paulownia wood

Length: 240mm

Weight: 135g

Recommended trebles: 2 x GT Recorder
6/0 or 7/0 on belly and Kudako 8/0 on tail.

Also 2 x ST76 4/0

or 2 x Jignesys 15/0 singles.

ACTION:

Long/short sweeps for splash,
bubble trail and "S" motion
swimming. Rough water special.

2mm S/S through wiring

Kaxü 260 FS

Floating Sweeper Rough Waters

DETAILS:

Crafted from Paulownia wood

Length: 260mm

Weight: 160-170g

Recommended trebles: 2 x BKK GT Rex 7/0 or bigger.

Single hooks: 2 x BKK Lone Diablo 13/0

Combined treble / single hook

ACTION:

Long/short sweeps for splash, bubble trail and "S" motion swimming. Rough water special.

Weight: 205-215g

**Recommended trebles: 2 x BKK GT Rex 7/0
or bigger.**

Single hooks: 2 x BKK Lone Diablo 13/0

Combined treble / single hook

ACTION:

**Long/short sweeps for splash,
bubble trail and "S" motion
swimming. Rough water special.**

Amegari Lures are shaped according to Orkatz's selected prototypes. Weight may vary from one lure to another and there might be also slight shape differences on same model since everything is crafted at Amegari's workshop using no automation.

Amegaris are in constant evolution. We never stop producing new prototypes to amaze fish first, anglers second. We know there is always a spot for improvement and we try to be as aware as possible.

Amegari Tuna & GT Toys production is very limited since the process includes several treatments which take up to 30 days for lure completion, then we retest all batches and still dedicate time every month for new proto development.

We are always open to suggestions, initiatives and advices. We guarantee all our products come from own inspiration, eagerness and love for the sea & our favourite sport.
